

Water Treatment Engineer

Res-Kem Corp designs and builds water treatment equipment for use in commercial and industrial applications. We have an opening in engineering and are encouraging engineers experienced in the any water related field (waste, process, boiler, municipal) to apply. We will also consider service technicians from within the water treatment industry who have solid design and AutoCAD experience. Salary is commensurate with experience.

Functions

Product design, project management, technical support for customers

Create operational and parts manuals

Prepare submittals

Detail components and send to vendors for quotes

Create AutoCAD assembly drawings

Assist in assembly when required

Estimate equipment from sales to quote

Experience

BS Mechanical / Industrial Engineering (Associates Degree is acceptable but dependent upon level of experience in water treatment industry)

Submit resume and salary requirements in confidence to: denise@reskem.com
