RES-KEM CORPORATION

**Water Treatment Equipment
and Services**

DESIGN AND FABRICATION

Manufacturing the correct water treatment system that meets your needs begins with a thorough understanding of your manufacturing process. Res-Kem's experienced team of process, design, and sales engineers will work with you to determine the most cost effective solution.

DISTRIBUTED PRODUCTS

Working from a fully stocked, 12,000 sq. foot warehouse, Res-Kem offers same-day shipment for various carbons, ion exchange resins, filter media, tanks, valves, and expendibles. For carbon and resin rebeds Res-Kem personnel, certified for confined space entry, are available to safely complete the job on your site from start to finish.

SERVICE

Res-Kem personnel have many years experience modifying, converting, and upgrading older systems to more current state-of-the-art designs.

Service contracts and preventative maintenance contracts are available for all equipment regardless of manufacturer.

Res-Kem's ISO 9002 certified ion exchange regeneration facility is unique to the service DI business and is capable of both standard and specialty regenerations.
