

Res-Kem Corp supplies a complete line of tanks from polyethylene chemical tanks to "ASME CODE" steel pressure vessels. Tanks are furnished for new applications or replacements to existing units. Our engineering department can design water treatment system replacement tanks including internal distributors and under-drains. Whether purchasing new or upgrading, see Res-Kem for your tank needs.

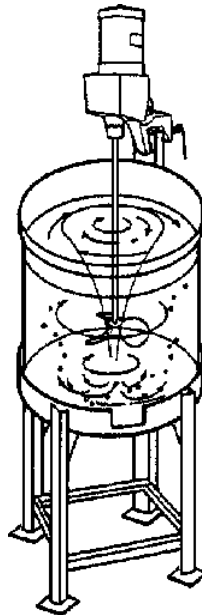

ASME Code and Non-Code Pressure Vessels for softeners, filters, dealkalizers, demineralizers. Unlined or lined tanks available in carbon steel, stainless steel or galvanized.

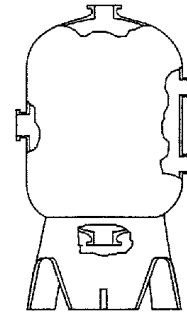

Internal collectors and distributors of PVC, CPVC, polypropylene or stainless steel can be supplied for all tank applications.

Polyethylene and FRP Tanks for bulk chemical storage and transporting. Vertical or horizontal arrangement with or without saddles/skids.

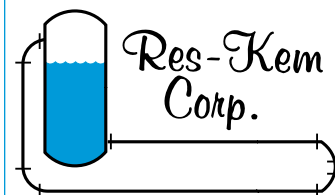

Open or Closed Top Tanks for chemical feed and storage. FRP, steel, polyethylene, or stainless steel available with or without pump stands.

PolyGlass™ Industrial and Commercial Tanks for softeners, filters, D.I. systems, and pure water storage. 24" to 48" diameter non-code or ASME CODE.

FRP, PolyGlass™, Thermo-wound® Pressure Vessels for softeners, filters, D.I. exchange systems. Residential, Commercial and Industrial Applications.
